

building trust. driving confidence.

Attention: ICBC Material Damage Suppliers

Subject: Three dimensional measuring equipment requirements

Recently ICBC has received questions from our Express Repair suppliers asking if they are required to use the Wedge Clamp brand of collision measuring equipment.

As stated in the Tool and Equipment Requirements form [CL174C](#), ICBC-accredited suppliers are required to have a three dimensional measuring system for estimates and repairs. **ICBC does not endorse a specific brand of three-dimensional measuring equipment.**

If you have any questions regarding equipment requirements please contact ICBC's Accreditation Department at 604-777-4513 or by email at carshop@icbc.com

Thank you,

Dennis Hertslet
Manager, MD Programs Compliance
