Attention: Express Repair Participants

ICBC's Material Damage Strategic Solution (MDSS) Industry Advisory Committee Kicks Off

ICBC held its first MDSS Industry Advisory Committee (IAC) meeting regarding the company's move to replace its current material damage estimating software solutions and supporting legacy systems. The following [presentation](#) provides highlights of that meeting.

In the coming weeks, we will be reaching out to each Express Repair participant to identify a focal point who will help communicate information to their respective shop(s) and staff. In the meantime, if you have any questions, please contact the project team at mdss@icbc.com.
